

DOING BUSINESS IN THE UK

There are many reasons why you may have decided to expand your business into the UK, but having made that choice it is important to be compliant with the taxation and accountancy obligations of doing so and to ensure that you are structured effectively.

With US businesses and their owners being subject to US taxation and informational reporting requirements on their global activities, understanding the UK system and how it interacts with their US obligations is often critical to their continued success.

The team at Frank Hirth is experienced at assisting businesses in determining their reporting presence in the UK and subsequently helping them understand what that means and remaining compliant.

US/UK dual qualified tax specialists work with you to keep your taxes optimised across both jurisdictions, and can also assist with the US reporting of your overseas business activities.

The integrated relationship between our London and New York offices provides optimal support for transatlantic businesses.
